

# Christmas Parade

## Santa Tracking App Instructions

The Glympse App allows anyone to track the location of Santa as he passes through Camarillo over the course of the day. The app is free to use and can be viewed on either a desktop computer or mobile device (including both Apple and Android devices). Viewers simply need to download the Glympse app on their mobile device or utilize a web browser on their desktop computer to access the link on the 2020 Camarillo Christmas Parade Facebook Event Page.

### Steps for Mobile Devices

1. Download the Glympse App on your mobile device
2. Access the link via the 2020 Camarillo Christmas Parade Facebook event page.
3. Keep an eye on Santa!

\*Note that Santa will be stopping at several changeover points throughout the day but will not be available for visitation during those times. In addition, it is possible Santa Claus could end up being as much as 30 minutes ahead or behind of schedule, and viewers are thus advised to keep track of Santa's progress through town on the Glympse app as needed. Participants who will not see Santa drive directly by their residence are invited to see Santa at one of our many route viewpoints as seen on the publicly available route maps.
